 Not sequential**Description of Noncompliance :**

Description of the Noncompliance : General Motors has decided that certain 2024 model year Buick Envision vehicles fail to conform to S4.3.3 of Federal Motor Vehicle Safety Standard (FMVSS) No. 110 "Tire Selection and Rims." These vehicles are missing the label that provides the tire size and cold tire pressure for the front and rear tires and the gross vehicle weight ratings.

FMVSS 1 : 110 - Tire selection and rims

FMVSS 2 : NR

Description of the Safety Risk : Without tire and gross vehicle weight rating information available on the label, there is a risk that customers may overinflate or underinflate their tires or exceed the recommended weight ratings, increasing the risk of a crash.

Description of the Cause : The label was not installed by the GM supplier contracted to perform this work at the port of entry.

Chronology :

A GM supervisor submitted this issue to GM's Speak Up For Safety (SUFS) program on August 22, 2024 following notification from a dealer in Texas of approximately 20 Buick Envision vehicles with missing certification labels. GM opened a product investigation on August 30, 2024. GM's investigation found that the supplier did not install the certification label on the driver side lower B-pillar at the port of entry. On September 19, 2024, GM's Safety Field Action Decision Authority (SFADA) decided to conduct a noncompliance recall.

Description of Remedy :

Description of Remedy Program : Dealers will install the missing label.
Pursuant to 49 C.F.R. § 573.13(d)(1), all covered vehicles are under warranty, so reimbursement is not offered.

How Remedy Component Differs from Recalled Component : The label installed by dealers will provide the correct tire size and cold tire pressure for front, rear, and spare tires and the correct gross vehicle weight ratings.
