# Part 573 Safety Recall Report

## 24V-797

**Manufacturer Name:** General Motors, LLC

**Submission Date: OCT 24, 2024** NHTSA Recall No.: 24V-797 Manufacturer Recall No.: N242454440

#### **Manufacturer Information:**

Manufacturer Name: General Motors, LLC

Address: 29427 Louis Chevrolet Road

MAIL CODE 480-210-2V WARREN MI

48093

Company phone: 586-596-1733

## **Population:**

Number of potentially involved: 413,498

Estimated percentage with defect: 1 %

#### **Vehicle Information:**

Vehicle 1: 2021-2021 Cadillac Escalade

Vehicle Type: **Body Style:** Power Train: NR

Descriptive Information: 2021 Cadillac Escalade Manufacturing records were used to determine vehicles that

may experience the defect condition.

This recall only involves vehicles equipped with diesel engines. Vehicles equipped with gas engines use a different transmission and are not affected by this recall.

There are 885 Cadillac Escalade vehicles affected by this recall.

Production Dates: AUG 17, 2020 - SEP 21, 2021

End: NR VIN Range 1 : Begin : NR

Vehicle 2: 2021-2021 Cadillac Escalade ESV

Vehicle Type: **Body Style:** Power Train: NR

Descriptive Information: Manufacturing records were used to determine vehicles that may experience the

defect condition.

This recall only involves vehicles equipped with diesel engines. Vehicles equipped with gas engines use a different transmission and are not affected by this recall.

There are 635 Cadillac Escalade ESV vehicles affected by this recall.

Production Dates: AUG 17, 2020 - SEP 21, 2021

## **Description of Defect:**

Description of the Defect: General Motors has decided that a defect which relates to motor vehicle safety

may exist in certain: 2020 – 2022 Chevrolet 1500 and GMC Sierra 1500; 2020 – 2021 model year Chevrolet Silverado 2500/3500 and GMC Sierra 2500/3500; and 2021 model year Cadillac Escalade and Escalade ESV, Chevrolet Suburban and Tahoe, and GMC Yukon and Yukon XL vehicles equipped with diesel engines. A transmission control valve in some of these vehicles may be susceptible to excess wear over time, resulting in a gradual loss of pressure within the valve that can cause harsh shifting. In rare cases, the rear wheels may experience a momentary lock up.

FMVSS 1: NR FMVSS 2: NR Description of the Safety Risk: If the rear wheels lock-up momentarily while driving, there is increased risk

of a crash.

Description of the Cause: Excessive wear within the transmission control valve body can cause a fluid

leak leading to a pressure drop that causes certain valves to move

unexpectedly.

Identification of Any Warning Drivers may notice harsh shifting.

that can Occur:

### **Involved Components:**

Component Name 1: VALVE, CONT (W/BODY & VLV)

Component Description: Transmission Control Valve Body

Component Part Number: 24053053, 24048701, 24298877, 24299093, 24043767, 24049465, 24044192,

24047995

## **Supplier Identification:**

#### **Component Manufacturer**

Name: NR

Address: NR

NR

Country: NR

#### **Chronology:**

On June 5, 2024, a GM engineer submitted a report to GM's Speak Up for Safety (SUFS) program based on a customer claim that the wheels on a 2021 Sierra 2500 HD pickup allegedly locked up while towing a trailer, resulting in property damage to the vehicle and trailer. GM opened a new investigation into the condition on July 16, 2024.

GM previously investigated this condition and determined that, in some applications, excessive wear in a control valve in these transmissions was causing harsh downshifting and, in rare cases, a momentary (<150 ms) lock up of the rear wheels. Prior testing and analysis indicated this lockup was not sufficient to cause a loss of vehicle control, and GM had identified no reports of accidents or injuries associated with the condition.

On July 29, 2024, NHTSA notified GM that its VOQ monitoring process had identified new potentially related reports. GM's investigator completed analysis of the VOQs and a comprehensive field data search on September 17, 2024, which identified 1,888 field reports alleging a "lock up" potentially related to this

condition. GM received these reports between January 30, 2020 and August 2, 2024. GM also identified eleven alleged incidents potentially related to the condition, including vehicles veering off the roadway and, in some cases, incurring minor property damage. Three minor injuries were also reported, none of which were associated with a collision. GM and NHTSA also discussed a potentially related vehicle owner questionnaire (VOQ) in January 2024.

On October 17, 2024, GM's Safety Field Action Decision Authority (SFADA) decided to conduct a safety recall.

## **Description of Remedy:**

Description of Remedy Program: Dealers will install new transmission control module software that will

monitor valve performance and detect excess wear approximately 10,000 miles before a wheel lock up condition could occur. Once detected, the transmission will be limited to fifth gear, preventing the possibility of a wheel lock up condition, which occurs in a downshift from eighth gear. A service engine light and reduced propulsion message will also display in

the instrument panel.

Pursuant to 577.11, GM will provide reimbursement to owners for repairs

according to the plan submitted under USG 5916 on May 12, 2023.

from Recalled Component:

How Remedy Component Differs The new transmission control software will detect this condition and prevent rear wheel lock-up by placing the transmission into fifth gear until the next key cycle. This will be accompanied by a service engine light and

reduced propulsion message. The driver will experience this as sluggish

or reduced propulsion.

Identify How/When Recall Condition All 2022 model year Silverado 1500 and Sierra 1500 vehicles produced was Corrected in Production: after March 21, 2022 were built with new transmission control software that detects excessive wear. The new transmission control software was implemented for all other affected models at the start of the 2022 model

year production.

#### **Recall Schedule:**

Description of Recall Schedule: Dealers will be notified on October 24, 2024. Owner notification is

estimated to begin on December 9, 2024.

Planned Dealer Notification Date: OCT 24, 2024 - OCT 24, 2024 Planned Owner Notification Date: DEC 09, 2024 - DEC 09, 2024

\* NR - Not Reported
