## Chronology :

On or about October 2, 2024, as a result of an internal audit and outside counsel, VanCraft was made aware of a potential safety issue related to the hardware components used in the bench seating system found in the rear of VanCraft's campervans. As a result of further investigation and consultation, on November 5, 2024 VanCraft determined that a population of campervan conversions built between 2017-2020 did not have the proper seat belt anchor hardware.

As of November 8, 2024, VanCraft is not aware of any customer complaints, warranty claims, injuries, or property damage as a result of this issue.

## Description of Remedy :

Description of Remedy Program : Registered owners of all affected vehicles will be contacted by mail and asked to take their vehicle to an authorized VanCraft dealer service location. The dealer will replace the seat belt anchor hardware with hardware that is in compliance with FMVSS 571.209.S4.1.f.

Reimbursement requests will follow the general reimbursement plan on file with NHTSA.

How Remedy Component Differs from Recalled Component : The remedy components will comply with Federal Motor Vehicle Safety Standards FMVSS 571.209.S4.1.f.

Identify How/When Recall Condition was Corrected in Production : The subject vehicle model is no longer in production.

### Recall Schedule :

Description of Recall Schedule : The recall schedule will follow the 60 day requirement.
