From PS&T Service Operations

Subject UPDATE-Seat Weight Sensor Safety Recall

Early next week, the following safety recall service bulletins will require seat weight sensor replacement as the repair. Replacement of the seat frame or seat rails will no longer be required.

Year	Model	Remedy Service Bulletin
2020–22	Accord	24-016
2020–21	Accord Hybrid	
2020–21	Civic (includes Civic Si)	24-017
2021	Civic Type R	24-034
2020–21	CR-V	24-021
2020–21	CR-V Hybrid	
2021	Insight	24-037
2020–22	Odyssey	24-020

To support this change, American Honda will be making an allocation of Seat Weight Sensor Kits (P/N: 04945-TBA-A00) to your dealership starting Saturday, October 5th.

American Honda requests that you do not return or cancel these orders as you will need these kits for vehicle repairs.

These parts will be allocated weekly based on availability. As inventory improves, we will work towards increasing dealer allocation.

The installation of the seat weight sensors will require special tools that have been shipped to your dealer.
