

VOLKSWAGEN DEALER COMMUNICATION

Repair Available – Safety Recall 20UF / Suction Jet Pump

This notice is for: All Dealer Personnel

Date: August 05, 2024

Issue: The suction jet pump inside the fuel tank is designed to purge fuel from the Evaporative Emissions (EVAP) system. If a specific seal inside an affected suction jet pump fails, the fuel may flow directly into the EVAP system. If this happens, fuel could accumulate in the EVAP system and may leak through the charcoal canister filter element. Leaking fuel, in the presence of an ignition source, may result in a fire.

- Repair:**
- REPAIR AVAILABLE – August 06, 2024 / Replace the suction jet pump
 - See ELSA and Service References in Elsa2Go for complete repair & claiming instructions
 - Check both the daily Campaign Open Inventory report and OMD for affected vehicles in inventory. Verify OPEN status in ELSA on the day of repair.
 - Repair every affected inventory vehicle before delivery to consumers.

Parts Department: Dealers will be sent an initial allocation prior to customer notification. If no initial allocation was received, please reference your dealer's Estimated Remaining Repairs by campaign to view your potential VIN population.

IMPORTANT REMINDER: VEHICLES AFFECTED BY SAFETY & COMPLIANCE RECALLS

New Vehicles in Dealer Inventory: It is a violation of federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by this notification under a sale or lease until the defect or noncompliance is remedied. By law, dealers must correct, prior to delivery for sale or lease, any vehicle that fails to comply with an applicable Federal Motor Vehicle Safety Standard or that contains a defect relating to motor vehicle safety.

Pre-Owned Vehicles in Dealer Inventory: Dealers should not deliver any pre-owned vehicles in their inventory which are involved in a safety or compliance recall until the defect has been remedied.
