Re: NHTSA Safety Recall: 24V150; nuCamp Safety Recall - Battery Disconnect Switch

Pleasant Valley Teardrop Trailers LLC has decided that a defect, which relates to motor vehicle safety; exist in certain 2023-2024 nuCamp Tab400, Circus 820 & 620 trailers equipped with lithium upgrade units there is a 250AMP Battery Disconnect Switch installed, which is not sufficient to carry a consistent draw above the 250AMP rating. If there is a consistent draw above the 250AMP rating, then it could cause wires to melt near the Battery Disconnect Switch, increasing the risk of a fire. Pleasant Valley Teardrop Trailers/nuCamp will be replacing the 250AMP battery disconnect switch with a 400AMP battery disconnect switch.

We are providing this information for you in hopes of correctly resolving this issue in a timely manner. The safety recall is attached in this email for your review.

Unit Information:

- 2023 & 2024 TAB 400, Cirrus 620 & Cirrus 820 - 163 total units.
- VIN numbers will be provided to the dealer for reference.

Resolution Process:

- nuCamp will provide the parts and instructions necessary.
- All customers will be notified by letter and email.

Sincerely,

Aaron Hawkins
Parts & Warranty Manager
