

New Safety Recall Advanced Communication – 28B

FCA US LLC (FCA US) has announced a safety recall on certain 2023 and 2024 Model Year (GG) Dodge Hornet and (GC) Alfa Romeo Tonale vehicles.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with a non-compliant tire placard that does not correctly define the maximum Vehicle Capacity Weight (VCW) value. A driver may rely on the incorrect VCW and overload the vehicle, which can cause a vehicle crash without prior warning.

FMVSS 571.110 (S4.3) - Placard, requires that "each vehicle shall show...(a) vehicle capacity weight expressed as "the combined weight of occupants and cargo should never exceed XXX kilograms or XXX pounds.""

SERVICE ACTION

FCA US will conduct a voluntary safety recall to add an overlay label to the tire placard information. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 2nd Quarter of 2024.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
