

New Safety Recall Advanced Communication – 32B

FCA US LLC (FCA US) has announced a safety recall on certain 2024 Model Year (GG) Dodge Hornet and (GC) Alfa Romeo Tonale vehicles.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with a manufacturer label that is missing rim and tire size designation information. A driver may use an incorrect rim size, which can increase the risk of a crash.

Federal Motor Vehicle Safety Standard (FMVSS) 571.110 S4.3.3 "Additional Labeling Information for Vehicles Other Than Passenger Cars" requires "Each vehicle shall show the size designation and, if applicable, the type designation of rims (not necessarily those on the vehicle) appropriate for the tire appropriate for use on that vehicle, including the tire installed as original equipment on the vehicle by the vehicle manufacturer" to be printed on the manufacturer label. Subject vehicles are equipped with a manufacturer label that is missing the size designation of the rims.

SERVICE ACTION

FCA US will conduct a voluntary safety recall to apply a manufacturer label overlay with corrected information. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 2nd Quarter of 2024.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
