
Hello,

Attached is information for Daimler Truck North America's recall F1003. This recall has not yet been released. Owners have not been notified. If you need to update owner addresses then please do so by sending the updated information to our registrations department at WarrantyDEP@Daimlertruck.com within 10 business day of this notification.

Our process has recently been updated. You will now receive a "Stop Delivery Notice" along with a copy of the DIR/DIN, and the VIN list of vehicles.

Please see attached documents and notice below.

F1003 Stop Delivery Notice
Communication Type: Campaigns
Date: 07/05/2024

Colleagues,

Please see attached Stop Delivery Notice on pending safety recall:

Number: F001
Title: Cummins L9 – Remote Fuel Filter Hose
Population: 56

We are providing this instructional communication to address new vehicles that are currently in dealer or distributor inventory (e.g. new trucks in dealer or distributor inventory that have not been put into service).

These new vehicles are to be held until the subject recall has been completed.

If a dealer or distributor has a new vehicle, included in the safety recall in their inventory to be sold, the defect condition must be corrected before releasing it to a customer.

It is a violation of Federal law for a dealer or distributor to deliver a new motor vehicle with an open recall.

If you have any questions regarding this information, please the DTNA Campaign Group at 503-745-7366, or email: DTNA-WAR-Campaigns@daimlertruck.com .

Thank you,

DTNA Campaign Management
