**MODEL Z & Z Air RECALL**  
**12 V Over-Current Protection & Wiring**  
July 1, 2024

Dear Valued Dealer Partner,

It has come to our attention that in certain Model Z fifth wheels and Model Z-Air travel trailers, within the 12 V system, there may be a lack of overcurrent protection and incorrect size wiring for certain applications.

We are conducting a Recall Campaign to address this concern on the units below:

Model Z 2900/3100/3110/3400/3610

VIN 0001-1440 (Overcurrent protection & refrigerator wire)

VIN 1441-3058 (Overcurrent protection)

Model Z Air 285/295

VIN 0001-0105 (Overcurrent protection)

**NOTICE**

**IT IS A VIOLATION OF FEDERAL LAW FOR A DEALER TO SELL OR LEASE ANY NEW VEHICLES IN DEALER INVENTORY COVERED BY THIS NOTIFICATION UNTIL THE VEHICLE HAS BEEN REPAIRED.**

The remedy is to inspect the mini breaker layout in the front compartment and adjust connection points as needed. Additionally, certain units may need to have a new power wire routed to the refrigerator. It is highly recommended that a Brinkley-authorized dealership perform the work. **Brinkley will pay for the Campaign to be completed. There is no charge to you for the remedy.** See the Dealer Portal for further details and associated documentation:

1. Sample Retail Owner notification letter
2. Claim prep and filing instructions
3. Recall fieldwork instructions
4. NHTSA 573 Safety Recall Report
5. NHTSA Recall Acknowledgement Letter

Relevant information is also being communicated via our Dealer Portal. Retail customers are being contacted through traditional hard copy mailings, e-mail, and social media starting on 7/8/24.

We apologize for any frustration or inconvenience that this situation causes.  
Sincerely,

**Brinkley Customer Care**

Brinkley RV Dealer Portal notification (Posted 7/1/24)

- Recall 24V-476 (900003) Over Current Protection
  - Recall 24V-476 (Flat Rate 900003)**  
**Model Z fifth wheel & Z Air TT 12V Over-current Protection & Wiring**

It has been decided that in certain Model Z fifth wheels and Model Z-Air travel trailers, within the 12 V system, there may be a lack of overcurrent protection and incorrect size wiring for certain applications. The remedy is to inspect the mini breaker layout in the front compartment and adjust connection points as needed. Additionally, certain units may need to have a new power wire routed to the refrigerator. Brinkley RV will completely cover the costs for the remedy.

**This recall affects a total of 3157 vehicles. Please be advised of the vin specific work instructions for each affected vin range.**
