Integrated Brake System Recall 24V -104 (M34 01 24) & IB Servomotor Recall 24V-697 (M34 02 24) Update

IB Repairs and Claim Submissions

Before proceeding with performing IB Recall Replacement procedure and submitting a claim, first review the Affected Vehicle's Repair History (Claims) section located at the bottom of the Warranty Vehicle Inquiry (WVI) to confirm that a prior IB replacement claim (Recall DC, AIR DC 3450011500, or other AIR IB DC) has not already been submitted and accepted. If a prior IB replacement claim is listed, please use that claim information to determine if an IB replacement is still necessary.

When an IB replacement is necessary, it is important to use the correct Recall Defect Code for the IB claim submission. Please also close out the second IB Recall if that still shows open, as well as any other corresponding IB related actions that apply.

IB Replacement Parts

It's important that you use the IB parts on your shelf prior to ordering any additional parts. Our records show that some centers / dealers have over 100 IB parts in stock.

IB Part Ordering Update

- - Recall parts are non-returnable
 - All IB parts will be removed from YOCV ordering on Monday, January 12, 2026.
 - IB parts will be opened to order but may have a weekly order limit. Please see the Flowcode on Monday, January 12, 2026 for more information.
