

New Safety Recall Advanced Communication – A1B

FCA US LLC (FCA US) has announced a safety recall on certain 2023 and 2024 Model Year (DT) Ram 1500 Pickup vehicles.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with a Steering Column Control Module (SCCM) where mechanisms within the turn signal lever experience an interference condition that disables the self-cancelling function. A turn signal which does not self-cancel and remains active after a completed turn may cause surrounding drivers to misunderstand the intent to change vehicle direction which can cause a vehicle crash without prior warning.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 571.108 S9.1.1 requires that "The turn signal operating unit must be self-canceling by steering wheel rotation and capable of cancellation by a manually operated control." A SCCM with an interference condition may not allow the self-canceling feature to function correctly.

SERVICE ACTION

FCA US will conduct a voluntary safety recall to inspect and if necessary, replace the SCCM. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 4th Quarter of 2024.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
