RE: IMPORTANT SAFETY NOTIFICATION –

To: Dealers

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

The Aluminum Trailer Company (ATC) has decided that a defect, which relates to motor vehicle safety, exists in certain Stacker and Car Hauler models built from 2013 to 2024.

ATC has determined that stress on the tongue tube at the front wall could cause A-frame tube to crack and eventually break, which could cause the trailer to become detached from the towing vehicle, increasing the risk of a crash. Safety of all past and present ATC trailers is our top priority.

Owners will be notified by mail about the recall. ATC will supply angle supports to be welded to the A-frame to strengthen the tongue on car haulers and tube supports on stackers and prints for installation. There is no cost to owners for this recall. ATC will reimburse any customer providing sufficient documentation who incurred costs to repair the defect before our notification was sent.

Please be reminded that it is a violation of Federal law for you to sell or lease the trailers covered by this notification until this recall has been performed on these trailers. Substantial civil penalties apply to violations of this law.

Your assistance with this recall is appreciated. Should you have any questions or concerns, please contact Customer Support at The Aluminum Trailer Company by mail, P.O. Box 396 Nappanee, IN 46550; by phone (877) 441-2440, or electronic mail customersupport@atctrailers.com.

Sincerely,

The Aluminum Trailer Company
