

New Safety Recall Advanced Communication – 94B

FCA US LLC (FCA US) has announced a safety recall on certain 2018 and 2019 Model Year (WK) Jeep® Grand Cherokee and (WD) Dodge Durango vehicles.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with a hydraulic control unit (HCU)/anti-lock brake system (ABS) module that falsely reads pressure in the primary circuit. An HCU/ABS module that falsely reads pressure may illuminate the brake lights (up to 4.5 mph), disable the ABS and Electronic Stability Control (ESC), and allow the vehicle to start and shift out of park without the brake pedal being depressed. A brake light that inadvertently illuminates may result in surrounding drivers not receiving accurate indication of slowing or stopping, which can cause a vehicle crash without prior warning. Disabled ABS and ESC, that are needed to help control the vehicle, can cause a vehicle crash without prior warning. A vehicle that is able to start and shift out of park without depressing the brake pedal can result in unintended vehicle movement which can cause a vehicle crash without prior warning and/or injury to others outside the vehicle.

SERVICE ACTION

FCA US will conduct a voluntary safety recall on all affected vehicles. The remedy is under development and not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 1st Quarter of 2025.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
