<b>Recall Campaign Initial Notification</b>			<b>November 26, 2024</b>
<b>Campaign No. :</b>	<b>NHTSA ID</b>	<b>Campaign Desc. :</b>	<b>Check Sliding Roof Bonding</b>
TBA	24V847	24P2195442	
<p>This is to notify you of the <b>new Recall Campaign</b> to check the sliding roof bonding on <b>33,447</b> Model Year (“MY”) 2001-2011 C-Class, CLK-Class, E-Class and CLS-Class (203, 209, 211 and 219 platform) vehicles. The recall campaign will be visible on the www.NHTSA.gov website and may generate questions from customers. Affected VINs will be flagged in VMI as “PENDING” on <b>November 26, 2024</b> under a new NHTSA ID. These VINs were previously flagged under 22V954.</p>			
<b>Background</b>			
<b>Issue</b>	<p>Mercedes-Benz AG, the manufacturer of Mercedes-Benz vehicles, has determined that on certain MY 2001 - 2011 C-Class (203 platform), CLK-Class (209 platform), E-Class (211 platform) and CLS-Class (219 platform) vehicles, the bonding between the glass sunroof panel and the sliding roof frame might not meet specifications. In this case, the adhesion of the bond might deteriorate gradually over time. Therefore, the specified durability requirements of the bond would not be guaranteed. As a consequence, a separation of the glass panel from the vehicle cannot be ruled out. This could increase the risk of a potential accident and/or injury for other road users. When the adhesion begins to deteriorate, the customer might observe a partially detached panel or excessive wind noises in the area of the sunroof while driving.</p>		
<b>What We’re Doing</b>	<p>MBUSA will conduct a voluntary recall. An authorized Mercedes-Benz dealer will check the glass panel bonding on the affected vehicles and replace the sliding roof, if necessary.</p>
