Dear Honda Dealer:

Honda is issuing a STOP SALE NOTICE on CERTAIN 2022, 2024, and 2025 CRF1100L/LD/L4/L4D motorcycles to update the fuel injection electronic control (PGM-FI) unit software. Due to improper software programming in the PGM-FI unit, the torque control settings may be miscalculated when the Wheelie Control feature is enabled during certain riding conditions. If the torque control settings are miscalculated while the vehicle is in use, the engine may hesitate or accelerate improperly, increasing the risk of a crash or injury.

This Safety Recall replaces the Product Update Campaign #2 originally issued in December 2023 for CERTAIN 2022 CRF1100L/LD/L4/L4D motorcycles. Any affected unit that had the Product Update Campaign #2 repair performed must also receive the PGM-FI unit update as described in this Safety Recall.

Effective immediately, you **MUST NOT SELL any affected NEW or USED** 2022, 2024, or 2025 CRF1100L/LD/L4/L4D motorcycle until it is repaired according to the associated Service Bulletin. Additionally, you **MUST NOT SELL any replacement PGM-FI units** in dealer parts inventory with part numbers 38770-MLG-A42 or 38770-MLN-L02.
