NHTSA# 24V-890
TRANSPORT CANADA# 2024-715

DATE: 12/06/2024

MODELS AFFECTED:

2024-2025 Ekko Motorhomes

New Safety Recall / Stop Sale Notification

PLEASE FORWARD THIS INFORMATION TO YOUR RV SALES AND SERVICE MANAGERS.

Reason for this Safety Recall

Winnebago Motorhomes has decided that a defect related to motor vehicle safety exists on certain:

2024 – 2025 Ekko

These motor homes were manufactured **June 28, 2023**, through **September 18, 2024**.

Impacted units will be identified with labor operation code **24931111**. This labor op is for identification purposes only and will be replaced when the recall is activated.

Description

On certain Winnebago vehicles the wheel bolts (lug nuts) for the spare tire are not included.

If the Mercedes Benz spare tire is attached with the Method wheel bolts, the appropriate torque cannot be achieved. An inaccurately torqued wheel bolt increases the risk of the tire coming off in transit, which can increase the risk of an accident.

Service Action

Winnebago will conduct a voluntary safety recall; however, the remedy is not currently available. Dealers will be notified through established communication methods once a remedy is available.

Owners should be aware that if the spare tire is needed, the wheel bolts are not compatible with the spare tire.

We sincerely apologize for this inconvenience and want to assure you we are working diligently to remedy this situation.

Notice

It is a violation of Federal Law for a dealer to sell or lease any new vehicles in dealer inventory covered by this notification until the vehicle has been repaired.

Thank you for your continued partnership!
