Re: Stop Sale/Safety Recall: 2023-25 Passport, Pilot Fuel Tank Fill Pipe Inspection

On November 27, 2024, American Honda notified NHTSA of a **stop sale** and **safety & noncompliance recall** for certain 2023-2024 Passport and 2023-2025 Pilot units. During manufacturing, the fuel filler tube may have been improperly installed to the filler pipe. An improperly installed fuel filler tube may separate during a collision, causing fuel to leak, increasing the risk of fire and/or injury in the presence of an ignition source. **Refer to your eResponsibility report or perform an iN VIN status inquiry to determine which units in your inventory are affected.**

REPAIR

Inspect the fuel filler tube and, if necessary, properly connect it in place.

PARTS

No parts are needed for this recall.

TOOLS

There are no new special tools needed for this recall.

SERVICE BULLETIN

Service Bulletin 24-133, *Safety Recall: 2023-24 Passport, 2023-25 Pilot Fuel Tank Fill Pipe Inspection* posted to the Service Information System (SIS) as of December 3, 2024. It includes inspection, repair, and warranty claim information related to this recall.

CUSTOMER NOTIFICATION

American Honda expects to begin customer notification in early January 2025.

As always, perform an iN VIN status inquiry for all vehicles passing through your dealership to determine eligibility for any open campaigns.
