Dear Rolls-Royce Owner / Lessee:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Rolls-Royce Motor Cars Ltd. has decided that a defect, which relates to motor vehicle safety, exists in certain Model Year 2024-2025 Rolls-Royce Spectre motor cars. Our records indicate that you are the owner of a potentially affected motor car.

Why are we contacting you?

We are informing you of a safety recall on your motor car and are pleased to inform you that we are ready to perform the remedy. **We kindly request that you contact your authorized Rolls-Royce Motor Cars dealer to arrange an appointment to have this important repair performed as soon as possible.**

What could happen?

The Integrated Brake (IB) module may not function properly. If this happens, a warning lamp and message will be displayed in the instrument cluster. There will be a loss of power assist braking, which could lead to an extended stopping distance and increase the risk of a crash. The Antilock Brake System (ABS) and Dynamic Stability Control (DSC) system may also not function, which could affect motor car handling and result in a loss of control. Please note that higher pedal force may be required.

If you notice any of these conditions, your motor car may be experiencing this issue. Please drive carefully and avoid abrupt braking as much as possible. Please contact an authorized Rolls-Royce Motor Cars dealer as soon as possible to have the remedy performed.

If you are not the only driver of this motor car, please advise all other drivers and passengers of this important information.

What will Rolls-Royce do?

The Integrated Brake (IB) module will be replaced free of charge by your authorized Rolls-Royce Motor Cars dealer, which should take up to 3 hours.
