**IMPORTANT SAFETY RECALL 24506
NHTSA RECALL NO. 24V-180**

This notice applies to your vehicle identified on the enclosed card.

Dear INTERNATIONAL® Customer,

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Navistar has decided certain 2025 International® LT® series trucks built 01/03/2024 thru 01/23/2024 with feature code 08TVB (LED Stop, Turn, Tail & B/U Lights) may not conform to Federal Motor Vehicle Safety Standard (FMVSS) 108– Rear Turn Signal Lamp Activation.

REASON FOR THIS RECALL

Certain LT® series trucks may not conform to Federal Motor Vehicle Safety Standard (FMVSS) 108:

- S4 Definitions: “Turn Signal Lamps” are a signaling element of a turn signal system which indicates the intention to turn or change direction by giving a flashing light on the side toward which the turn will be made

- S7.1.2.5: Rear turn signal lamp activation table 1-a, Device Activation, “...flash when the turn signal flasher is actuated by the turn signal operating unit.”

RISK TO MOTOR VEHICLE SAFETY

Turn signals that do not conform to all the requirements of FMVSS 108 may not alert other motorists of the direction of the intended turn or change of direction which can increase the risk of a vehicle crash that may result in property damage or injury.

DEFECT REMEDY

The repair will involve replacement of the taillight jumper harness on any truck found with the rear turn signal lamps flashing in the opposite direction. Authorized repair centers have parts and instructions to repair your vehicle. The repair will be performed free of charge and take approximately 30 to 45 minutes to complete.
