Dear «Owner name»:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Airstream has decided that a defect, which relates to motor vehicle safety, exists in certain **model year 2025 Classic travel trailers**. As a result, Airstream is conducting a safety recall.

### *Reason for this recall*

Airstream, Inc. (Airstream) is recalling certain **model year 2025 Classic travel trailers**. There were units manufactured with power hubs that have an incorrect max fuse rating on the e-fusing. This may not allow the power hub to fault out, if an overheating scenario were to occur. This could result in a fire, increasing the risk of personal injury and/or property damage.

### *What we will do*

Airstream dealers will be instructed to install the new power hubs with the most recent firmware containing the correct max fuse rating for the e-fusing and a ground wire. This will be done at no cost to the customer. This repair will take approximately .50 hrs.

### *What we need you to do*
