These motor homes were manufactured May 21, 2012, through December 28, 2022. These manufacturing dates are a broad overview and not model specific. Our records indicate that you have purchased a vehicle with the serial number which appears above.

On certain motorhomes, the front turn signal lights may be too small. As a result, the turn signals could be difficult to see. A turn signal that is difficult to see could cause a person not to recognize when a driver intends to turn or change lanes. This could increase the risk of a crash.

IMPORTANT SAFETY RECALL

An update to federal safety standards in 2012 increased the required area of vehicle light lenses by **4 mm** to improve visibility. The front turn signal light on some vehicles may not meet the updated surface area requirements.

WHAT WE WILL DO

On certain affected vehicles, dealers will repair affected vehicles by installing new oval turn signal lights on Forza models, or by replacing the fog lights with new oval turn signal lights on Horizon models. This repair will take approximately 3 hours. **This repair will be done at no charge to you.**
