For Canadian residents: This notice is sent to you in accordance with the requirements of the Motor Vehicle Safety Act. This is to inform you that your vehicle may contain a defect that could affect the safety of a person.

## **WHAT IS THE DEFECT/NONCOMPLIANCE?**

It has been decided that solar panels on the vehicles in the recall population were wired in such a way that, in certain circumstances, the electric current from the system can exceed the sustainable capacity of certain components downstream of the panels.

## **EVALUATION OF THE RISK TO THE VEHICLE AND OPERATOR(S) RELATED TO THE RECALL.**

When maximum power is provided by the panel array, and consumed by the RV systems, the electric current produced can exceed the sustained capacity of the system immediately downstream of the panels. In certain circumstances, this can lead to failure of electric components, increasing the risk of fire.
