IMPORTANT SAFETY RECALL

This notice applies to your vehicle: VIN: [REDACTED]

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Subject: Safety Recall 24KWL – Bendix EC80 ABS ECU Software
NHTSA Recall number 24V915
Bendix Recall # 24E-086
EXPIRATION DATE: NONE

Dear Kenworth Customer,

Kenworth Truck Company has decided that a defect, which relates to motor vehicle safety, exists in certain Vehicle Model Year 2021-2025 Kenworth chassis configured for trailer towing manufactured from 05/22/2020 through 12/03/2024.

Electronic noise and/or low signal strength on the Power Line Carrier (PLC) signal from a trailer to the Bendix EC80 ABS ECU could cause the ABS system to incorrectly process certain signals. This can lead to the Bendix EC80 ABS ECU setting faults, malfunctioning, or not operating. ABS faults could affect the operation of other ABS-connected systems such as Automatic Traction Control, Electronic Stability Control, Active Cruise Control, and/or Collision Mitigation System.

These faults could cause the ABS system to respond incorrectly to a stability or automated braking event, increasing the risk of a crash. The ABS warning lamp will be illuminated in the event of faults in the ABS system or when the ABS system stops operating.

Kenworth has initiated a recall in cooperation with Bendix to remedy the defect. Please contact your Kenworth dealer. You can find your nearest Kenworth dealer using the Dealer Locator on our website www.Kenworth.com or by scanning the QR code on this letter.

This repair may take up to **1 hour** of labor depending on dealer scheduling. This repair will be performed at no charge to you.

<i>The problem is...</i>	Bendix EC80 ABS ECU could incorrectly process signals.
<i>What your dealer will do...</i>	Dealers will update Bendix EC80 ABS ECU software.
