Subject: Engine Emergency Vehicle Calibration

This notice is sent to you in accordance with the requirements of the *National Traffic and Motor Vehicle Safety Act*.

Daimler Truck North America LLC (DTNA), on behalf of its Freightliner Trucks Division, has decided that a defect, which relates to motor vehicle safety, exists in certain 2015-2020 Freightliner Business Class M2 emergency vehicles manufactured March 18, 2014, through September 6, 2019.

The vehicles are intended for use as emergency vehicles, but the engines have an automotive rating and are equipped with engine protection and inducement software, which could allow the engine to shut down unexpectedly. An unexpected engine shutdown can delay emergency responders and increase the risk of injury.

Cummins Distributors and authorized Warranty Dealers will update the electronic control module (ECM) calibration to the correct emergency vehicle rating. A new data plate with the applicable emergency vehicle rating information will also be installed. The Recall will take approximately two hours and will be **performed free of charge**.

Contact an authorized Cummins Distributor or authorized Warranty Dealers to arrange to have the campaign performed. To locate the nearest Cummins Distributor or authorized warranty dealer, call the Cummins directly at (800) 286-6467 or visit the Cummins website www.cummins.com/locations.
