QR Code

Get access to recall notifications, locate your nearest dealer, and more through this website or Mopar Owner’s Companion App. You will be asked to provide your Vehicle Identification Number (VIN) to protect and verify your identity. The last eight characters of your VIN are provided above.

DEALERSHIP INSTRUCTIONS

Please reference Safety Recall D1B.

IMPORTANT SAFETY RECALL

Radiator Crossmember Bolts

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA US LLC has decided that certain [2024 Model Year (WL) Jeep® Grand Cherokee and Jeep® Grand Cherokee L] vehicles fail to conform to Federal Motor Vehicle Safety Standard (FMVSS) No. 208 - Occupant crash protection and No. 301 - Fuel system integrity.

It is extremely important to take steps now to repair your vehicle to ensure the safety of you and your passengers.

WHY DOES MY VEHICLE NEED REPAIRS?

The radiator crossmember bolts on your vehicle ^[1] may not be properly secured to the body of the vehicle. Improperly secured bolts may compromise intended load distribution or energy management which may jeopardize proper crash sensing and fuel system integrity. **An incorrect crash sensing may lead to an improper airbag deployment which can increase the risk of injury to occupants of the vehicle in certain crashes. A compromised fuel system can lead to a fuel leak and potential fire which can result in increased risk of occupant injury and/or injury to persons outside the vehicle, as well as property damage.**

The condition above fails to conform to the requirements of Federal Motor Vehicle Safety Standard (FMVSS) No. 571.208 specifies vehicle crashworthiness requirements in terms of forces and accelerations measured on anthropomorphic dummies in test crashes and specifies equipment requirements for active and passive restraint systems. Suspect vehicles built with radiator crossmember bolts not properly secured may compromise intended load distribution or energy management which may jeopardize proper crash sensing and airbag deployment. FMVSS 571.301 specifies crashworthiness requirements in terms of structural energy management to mitigate post-crash fires and high voltage electrical risks. Suspect vehicles built with radiator crossmember bolts not properly secured may compromise the fuel system integrity.

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

FCA US LLC will repair your vehicle ^[2] free of charge (parts and labor). To do this, your dealer will inspect and ensure all radiator crossmember bolts are present and torqued to the proper specification. The estimated repair time is 20 minutes. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit, which may require more time. Your time is important to us, so we recommend that you schedule a service appointment to minimize your inconvenience. Ask your dealer for alternate transportation options while your vehicle is in service. Please bring this letter with you to your dealership.

TO SCHEDULE YOUR FREE REPAIR, CALL YOUR CHRYSLER, DODGE, JEEP OR RAM DEALER TODAY

WHAT IF I ALREADY PAID TO HAVE THIS REPAIR COMPLETED?

If you have already experienced this specific condition and have paid to have it repaired, you may visit www.fcarecallreimbursement.com to submit your reimbursement request online. ^[3] Once we receive and verify the required documents, reimbursement will be sent to you within 60 days. If you have had previous repairs performed and/or already received reimbursement, you may still need to have the recall repair performed.

We apologize for any inconvenience, but are sincerely concerned about your safety. Thank you for your attention to this important matter.
