

**A23-242466 – 2023 MY Chevrolet Colorado and GMC Canyon - Unwarranted Automatic
Emergency Braking (AEB) Events**

On February 15, 2024, GM's Safety & Field Action Decision Authority (SFADA) decided to conduct a Safety Recall on select 2023 Chevrolet Colorado/GMC Canyon vehicles equipped with the Veoneer front camera module because of a potential for unwarranted automatic emergency braking (AEB).

Production Build Model Years

2023 Chevrolet Colorado/GMC Canyon

US Population

Approximately 55,840 US Vehicles

Brief description of the condition

The Veoneer front camera module may trigger an unwarranted AEB event in a non-collision situation. Front Collision Alert operates in all speeds above 5 mph and AEB operates in a speed range between 5 mph and 85 mph.

Brief description of the remedy

Dealers will be instructed to conduct a calibration software update to the front camera module.
