SERVICE BULLETIN: **240514**
TITLE: Wheel nuts - No correct torque applied.
DATE: 5/14/2024
CUSTOMER: Various
UNITS EFFECTED: See list attached
SERVICE and WARRANTY: Service
Shop Hours Allowance: **1.0 hour for standard repair**

ISSUE:

It was identified that the torque on the wheel nuts was not confirmed on some trailers manufactured in Independence, Kansas plant from 01/01/24 2024 to 05/13/2024.

Risk: Wheel could become loose

ACTION REQUIRED

1. - Inspect and confirm that the wheel nuts have the correct torque applied.
Minimum 450 ft lbs. Maximum 500 ft lbs.
- 2.- If the torque is under the spec. apply the correct torque spec. 450-500 ft lbs.

Inspect the units in the list attached as soon as feasible.

Do not wait for the next scheduled maintenance.

2. - Contact STE Hackney - Kidron Warranty team to report the work done.
