

Dear Dealer,

Pagani has decided that on certain 2024 model year Pagani Utopia vehicles there is a possibility that, due to a defect identified in the manufacturing process of the PAB (passenger airbag) panel frame, the airbag could be damaged during its deployment and affect the performance of the occupant protection system, increasing the risk of injury during a front crash event.

Out of an abundance of caution, Pagani has started to remedy all the vehicles on the production line and has implemented a safety recall to eliminate this risk on all vehicles in the field, whether or not the defect is present. You have received from us a separate Notice of Safety Recall.

The remedy consists in the application of dry Kevlar strips on all the edges of the panel frame in order to avoid any contact of the carbon fiber with the airbag. The complete repair will take approximately 4 hours.

The remedy procedure will not include a replacement of the passenger airbag panel but will involve the application of Kevlar strips on the edges of the carbon fiber airbag frame to cover the roughness of the carbon fiber which could damage the surface of the airbag.

Pagani will repair the affected vehicles free of charge.

SPARE PARTS:

In order to carry out the service you need to order the following spare parts through the Dealer Portal:

P/N	Description	Q.ty
024723	Passenger Dashboard Panel Vert Layer LHD V4	1

CLAIM INFO:
