### WHY DOES MY VEHICLE NEED REPAIRS?

FCA US records indicate that you may have purchased an SCCM for your vehicle [1]. The SCCMs may have been built with an insufficient weld between an internal flexible flat cable and busbar. The defective SCCMs may not allow a deployment signal from the Occupant Restraint Controller to reach the driver airbag module, preventing airbag deployment. An airbag that does not deploy when intended may result in increased risk of injury to the driver in a crash.

The condition described above does not comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 208 requires driver's airbag deployment during certain crash events.

### HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

**The remedy for this condition is under development and not currently available.** We are making every effort to finalize the remedy as quickly as possible, and will service your vehicle free of charge (parts and labor).

FCA US will contact you again, by mail, with a follow-up recall notice when the remedy is available. Once you receive your follow-up notice, simply contact your Chrysler, Jeep®, Dodge or RAM dealer right away to schedule a service appointment [2]. Additional options for your next steps are included on the left side of this notification. We appreciate your patience.
