INTERIM SAFETY RECALL NOTICE FOR YOUR VEHICLE

A recall repair is not yet available

This notice is sent to you in accordance with the *National Traffic and Motor Vehicle Safety Act*. Volkswagen has decided that a defect, which relates to motor vehicle safety, exists in certain 2015-2020 model year Volkswagen vehicles. Our records show that you are the owner of a vehicle affected by this action.

About this recall:

The suction jet pump inside the fuel tank is designed to purge fuel from the Evaporative Emissions (EVAP) system. If a specific seal inside an affected suction jet pump fails, the fuel may flow directly into the EVAP system. If this happens, fuel could accumulate in the EVAP system and may leak through the charcoal canister filter element. Leaking fuel, in the presence of an ignition source, may result in a fire.

A recall repair is not yet available.

Right now, your dealer does not have the recall remedy information available to perform the recall work. Volkswagen is working to make the recall remedy available as quickly as possible, and we will send you another letter once repairs can begin. At that time, you will be able to schedule this work with your authorized Volkswagen dealer. The recall work will be performed for you free of charge.

In the interim, if the recall condition exists in the vehicle, you could experience refueling issues (early stopping fuel nozzles, spillback) when fuel has accumulated in the EVAP system. A fuel odor may also be noticed by vehicle occupants. If you are experiencing these issues with your vehicle, please contact an authorized dealer to have the vehicle diagnosed without delay.

Your safety and that of your passengers is our highest priority. We apologize for any inconvenience this letter may cause.

Sincerely,

Volkswagen Customer Protection

Volkswagen of America, Inc., 3800 Hamlin Road, Auburn Hills, MI 48326
