**Title**

MINI Safety Recall 24V-104: Integrated Brake (IB) Module

**Text**

The Integrated Brake (IB) module may not function properly. If this happens, a warning lamp and message will be displayed in the instrument cluster. There will be a loss of power assist braking, which could lead to an extended stopping distance and increase the risk of a crash. The Antilock Brake System (ABS) and Dynamic Stability Control (DSC) system may also not function, which could affect vehicle handling and result in a loss of control. Please note that higher pedal force may be required.

If you notice any of these conditions, your vehicle may be experiencing this issue. Please drive carefully, and avoid abrupt braking as much as possible. Please contact an authorized MINI dealer as soon as possible to have the vehicle remedied.

Contact an authorized MINI dealer immediately to get your vehicle repaired for FREE. Dealer locator: [miniusa.com/dealer](https://miniusa.com/dealer).

Advise all drivers of this important information.
