Indian Motorcycle has determined that some Model Year 2019-2020 and 2022 FTR, Model Year 2020-2022 Challenger and Model Year 2022 Pursuit motorcycles, equipped with a specific Anti-Lock Brake System (ABS) module may experience inadvertent brake light illumination, which increases the risk of a crash and serious injury. This can occur without rider input during certain limited riding conditions when a momentary loss of wheel contact with the ground occurs.
