**Urgent**

**Subject: Update - BMW Recall: 24V-104 Integrated Brake System (IB)**

We wanted to provide an update on Recall 24V-104 Integrated Brake System (B34 04 23). We recently turned all vehicles to Red X (Remedy Not Available) while we validated a potential issue in the software required to program the vehicle after performing the repair. We are continuing to evaluate a software issue on specific low mileage vehicles, and those vehicles will remain as Red X (Remedy Not Available). We will however begin turning vehicles with higher mileage Green (Remedy Available) again as additional parts become available.

Thank you for your patience and understanding.

Sincerely,  
Technical Service
