Details of the Recall

The Steering Column Control Module (SCCM) on your vehicle may have been built with an insufficient weld between an internal flexible flat cable (FFC) and busbar. The SCCM may not allow a deployment signal from the Occupant Restraint Controller to reach the driver airbag module, preventing airbag deployment. An airbag that does not deploy when intended may result in increased risk of injury to the driver in a crash.

FCA US LLC will repair your vehicle free of charge (parts and labor). To do this, your dealer will inspect and, if necessary, replace the steering column control module. The estimated repair time is one hour. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit, which may require more time.

How do I schedule my **FREE** repair?

- ◆ Simply contact your Chrysler, Jeep®, Dodge, RAM dealer right away to schedule a service appointment.

We apologize for any inconvenience, but are sincerely concerned about your safety. Thank you for your attention to this important matter.
