

Hyundai Recall 258 (NHTSA Recall # 24V-246)

Infotainment Messaging for Over-The-Air Update

Once the over-the-air (OTA) software has been downloaded and the background update is finished, the software update will be available to install.

Setup → General

- Software Info/Update screen text:

Update

There are ongoing updates.

Ready to install the infotainment system software.

- What's New will show on the right side of the message:

The update will start when the vehicle is turned off.

Navigation is not available during the update. (takes up to 10 minutes.)

Infotainment System

Software Version:

MX5.USA.ccPC.001.001.240513 (subject to change)

Important Update for Recall 258

This important update corrects a condition in the vehicle's Rearview Camera image that may become obstructed by a Trailer Parking Assist (TPA) message. As such, these vehicles fail to comply with the requirements of Federal Motor Vehicle Safety Standard No. 111, "Rear Visibility". Obstructing the rearview camera image could reduce the

rearward visibility, increasing the risk of a crash or injury. The Audio Video Navigation unit and its related features will be unavailable for the duration of the update (for approximately 5–10 minutes).

- Pop-up Screen Text after Engine is turned off:

When you select [Update Now], the screen will turn off and the navigation update will start. Navigation will turn off automatically after the update.

- Update Now [*selectable*]
- Details [*selectable*]
- Later [*selectable*]

- Details Screen Text:

No other functions, including the Rear View Camera and all audio, will be available during the update.

· Total Update Time: 10 min
