Title

BMW Safety Recall 24V-345: Driver/Front Passenger Safety Belt

Text

The driver and/or front passenger safety belt system may not have been produced by the supplier according to specifications. The system may sense that the driver and/or front passenger is belted even if they are not belted. In such a case, the safety belt warning lamp would not be illuminated in the instrument cluster. In a crash, the system may not perform as required which could increase the risk of injury.

Contact an authorized BMW center immediately to get your vehicle repaired for FREE. Dealer locator: bmwusa.com/dealer.
