

## Safety Recall 6724E – 2024 CX-90 - Sudden Braking Due to Improper Software

### CONDITION OF CONCERN

On certain CX-90 vehicles the brakes may activate suddenly due to false detection of certain objects at low speed (10-15MPH) driving. The automatic braking system may falsely detect a vehicle's reflection as an approaching object (such as a diagonal metal wall or similar object on the side of the road) due to improper programming of the VCM (Vehicle Control Module). In this condition, unintentional/sudden brake may activate. Although the brake lights will illuminate, this may increase the risk of a rear-end accident.

**REPAIR OUTLINE:** The repair will be to Reprogram the VCM with improved software via M-MDS, using MDARS.
