## SAFETY RECALL 24TA07 (Interim Notice 24TB07)

Engine May Stall During Driving  
Dealer Planning Update/FAQ

| Model / Years      | Production Period                       | Approximate Total Vehicles |
|--------------------|-----------------------------------------|----------------------------|
| 2022 – 2023 Tundra | Early November 2021 – Mid-February 2023 | 98,600                     |

### Remedy

Remove and replace engine assembly which includes turbos, intercooler and fuel system.

### Tech Requirements

**TIC201A – Engine Repair**

**TES001A - V35A-FTS Twin Turbo Engine**

**24TA07E-Learning (Estimated availability date is late November)**

### Inspection/Repair Time

**Repair: 13.5 hours**

### Parts Control at Launch

**Parts will be ordered through a website**

### Parts Replacement Rate

**100% (No inspection)**

### Campaign Phases

Four phases starting early December 2024 and ending 3<sup>rd</sup> Quarter 2025. Schedule is subject to change.

### Technician Requirements:

Technician will be required to have completed the following courses to perform the remedy for this Safety Recall. All courses must be completed. Please ensure you work with your technicians to level up their training to ensure the dealer has adequate technician support.

- TIC201A-Engine Repair
- TES001A – V35 Engine Overview E-Learning
- Campaign specific Course 24TA07 - **This course will launch between mid and late November 2024.**

### **Special Service Tools (Free of Charge)**

The following SSTs are being shipped to dealers to support the remedy for this Safety Recall. Shipments started in October and will continue through late November 2024. The high lift engine hoist being distributed will allow the dealers to remove the engine from the engine bay without disassembling the front end of the vehicle or lifting the cab off the vehicle.

- High Lift Engine Hoist
  - Currently shipping engine hoists
  - Engine Hoist will require assembly
  - Planning to complete distribution in late November

Example of Shipping Pallet

Engine Hoist Height Comparison (Hoist on left is Recall SST, hoist on right is normal hoist offered through ADE Program)

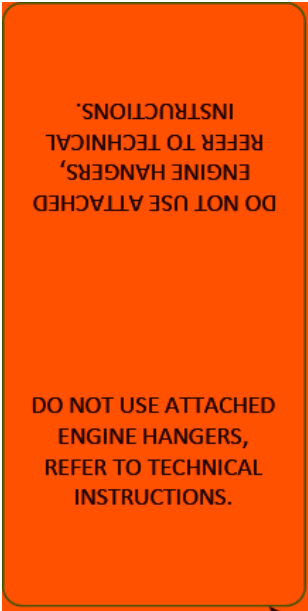

Note: During early engine hoist distribution, it was found that certain chains on the hook assembly had suspect welds. A letter was sent to all dealers on November 12<sup>th</sup> instructing affected dealers to stop use of the hoist until the chain assembly could be replaced. Affected dealers were instructed to discard the original chain assembly. For reference the letter is attached at the end of this document.

- Service Engine Hooks/Bolts SSTs
    - Distribution in process (completion late November)
    - Additional engine hooks/bolts may be ordered through the parts network after distribution is completed (After phase 1 Launch) at dealer cost
    - Hooks attached to the new engine assembly are NOT meant to be used to lift engine. These hooks are used in production and to secure the engine in the crate during transportation.  
**DO NOT use these hooks to lift the engine using the engine hoist.**
      - These hooks will come with white or orange labels as shown below
- The service hook SSTs being distributed to each dealer have a thicker base and longer bolts.

SEE CHART BELOW to ensure the correct hooks are being used.

**Example of label on the engine hooks assembled to the engine when delivered:**

| Part Description          | Part Number | Notes     |
|---------------------------|-------------|-----------|
| Service Engine Hook No. 1 | 12281-70080 | OK TO USE |
| Service Engine Hook No. 2 | 12282-70050 | OK TO USE |
| Service Engine Hook Bolts | 90105-A0354 | OK TO USE |

**NOTE: Spray paint service engine hooks (thicker base) a color that is easily visible such as yellow, orange, red, white, etc., before using.**

## Correct Hooks for Use

## \*Do Not Use to Lift Engine

**\*The hooks attached to the engine will be required to ship the old engine back. These hooks secure the engine assembly in the crate for shipping.**

### **Parts Ordering**

Parts for this recall will be ordered through a dedicated website.

Engine Assembly: Will be shipped from a 3<sup>rd</sup> party warehouse located in Memphis, TN. Please allow approximately 3-8 days for the engine to arrive at the dealer based on the map below.

Gasket Kits will ship from the dealer's facing PDC and will arrive at a different time than the engine. Once ordered, **engines are not returnable.**

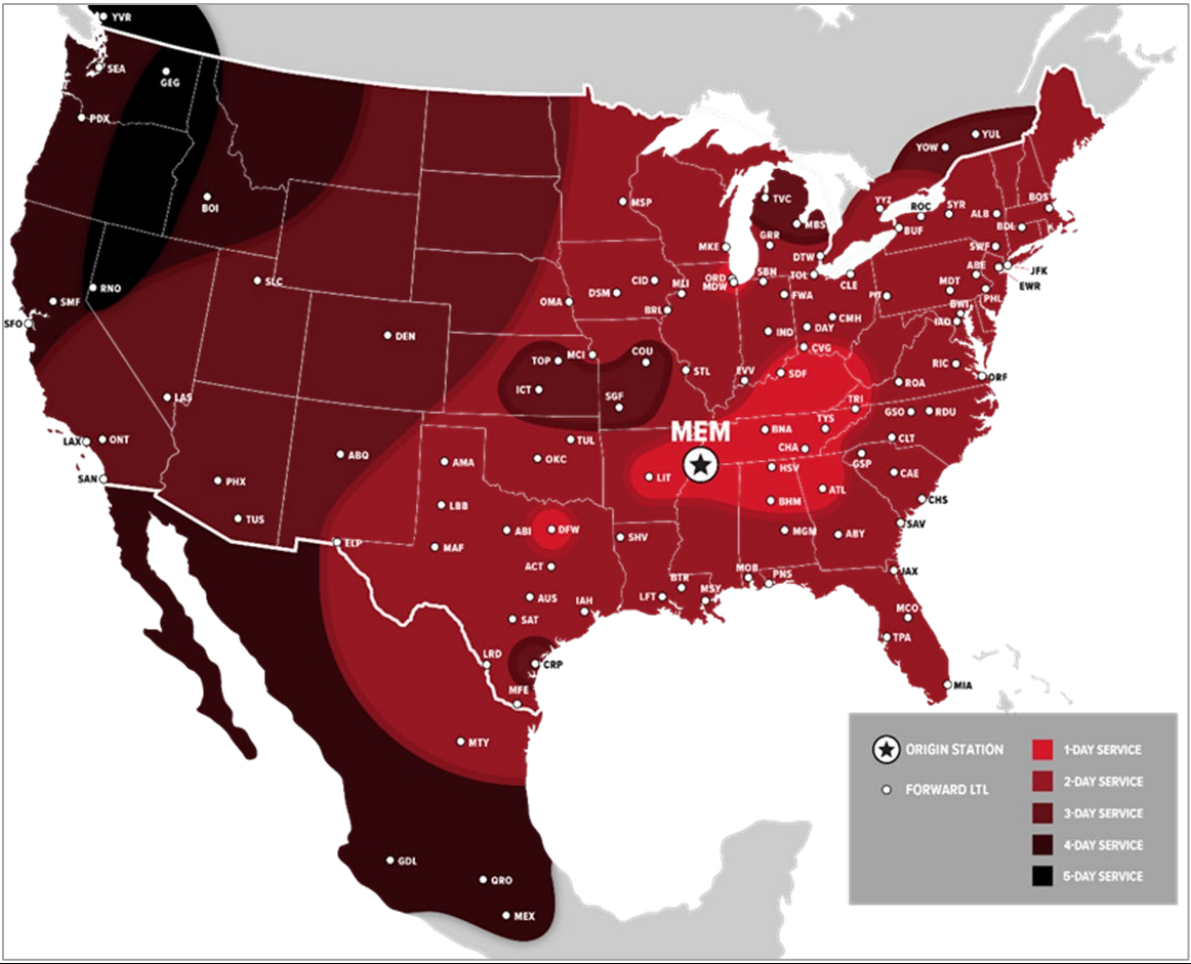

**Engines should not be stacked when being stored at the dealer.**

**Engines are very heavy so dealers should plan out where these will be stored. Do not store NEW engine assemblies outside.**

### **Engine Assembly Crate Dimensions: 48" x 36" x 38" (Weight: 640 lbs)**

Engine Order Estimated Shipping Lead Time Map shown below.

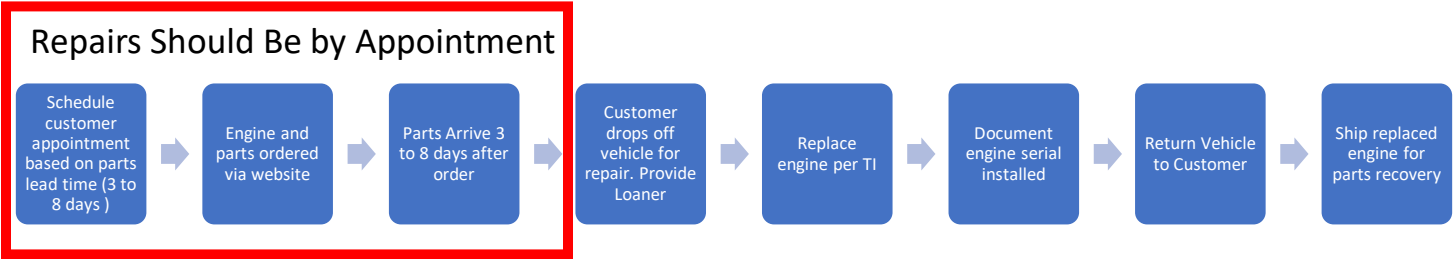

Note: Legend in map only accounts for in-transit time with carrier, orders need up to 3 days for processing. Please ensure this is considered when scheduling appointments.

Note: Hawaii part transit times are estimated to be 10-14 days.

**Customer Repair Process**

**Engine should not be stocked at the dealer. It should be ordered when an appointment is scheduled. The process below should be followed for this campaign to ensure best customer experience. A loaner vehicle may be provided between vehicle drop off and pickup.**

### **Engine Recovery**

All engines will be recovered using the existing Parts Recovery System. Dealers will be notified through Dealer Daily every 15 days if engine is not picked up. Dealers are subject to debit equal to the claim amount if engine is not returned within 45 days of claim being filed. Dealers will repackage engines using an absorbent mat while reusing the wood crate/plastic bag the engine comes in. A job aid will be provided to further clarify the engine recovery process.

All parts replaced as part of this Safety Recall must be turned over to the parts department for recovery. The parts department must retain these parts until notification via the Parts Recovery System (PRS) is received. To help minimize dealer storage challenges, Toyota recommends that dealers:

- File the campaign claim accurately and promptly. The time a dealer is required to hold parts is based on when the campaign claim is paid by Toyota.
- Monitor the Warranty Parts Recovery Notifications and Part Scrap Report regularly.
- Specific recovery instructions will be provided to certain regions at remedy launch.

## **SAFETY RECALL 24TA07 Engine Hoist SST Stop Use**

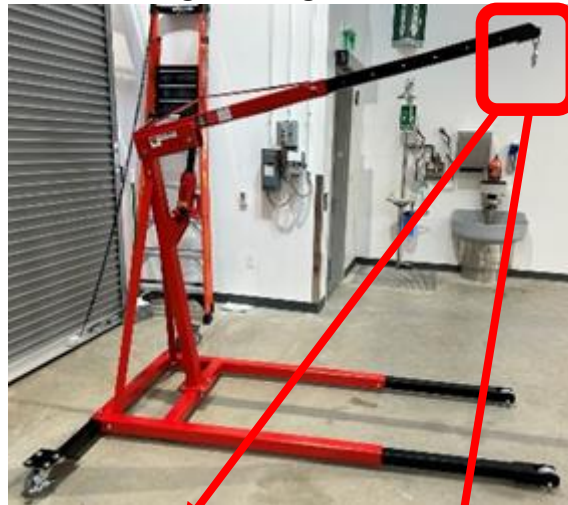

**Do not use high lift engine hoist, potential suspect welds on chain and hook assembly!**

Toyota Dealer Staff,

In preparation for the 24TA07 Recall remedy TMNA started shipping High Lift Engine Hoists to the dealer that will be used for the remedy. Hoist shipping started in October and is scheduled to complete in late November.

During this distribution, TMNA has been made aware of several cases where the hook and chain assembly provided with the SST has welds that appear incomplete and show cracks. (See images below) Due to this issue TMNA is instructing all dealers that have received the hoists to date to **stop use of the hoist immediately**.

**High Lift Engine Hoist**

Attached to the end of this letter are all dealers that received hoist and or have hoists in transit with potential suspect chains. Dealers are instructed to remove these chains from the hoist immediately so it can no longer be utilized, and the dealer should dispose of the chains so they cannot be re-used.

TMNA is working with the supplier to replace these chains as quickly as possible. At this time, TMNA cannot

provide an ETA for the new chain and hook assembly. TMNA will provide an update as soon as replacement chain and hook assembly information is available.

### Dealers with Hoist Shipment

Note: Dealers are listed in state alphabetical order. If your dealer or state is not listed you are not impacted by the suspect chain and hook assembly concern.

#### Alabama
