AMENDED DEFECT INFORMATION REPORT
24V-381

This amends Toyota's Part 573 Report of May 30, 2024 concerning the V35A Engine on certain MY2022-2023 Toyota Tundra, MY2022-2023 Lexus LX vehicles. It changes the remedy of the report.

Section 7, the Description of Corrective Repair Action, is revised to read as follows:

7. Description of Corrective Repair Action:

All known owners of the subject vehicles will be notified that, for vehicles presented for remedy before April 1, 2027, Toyota and Lexus dealers will replace the engine assembly with a new one free of charge. For vehicles presented for the remedy beginning April 1, 2027, Toyota and Lexus dealers will use an inspection software to evaluate the #1 main bearing and collect available vehicle drive data to confirm the condition of that bearing. If the inspection software cannot confirm that the bearing will be free from abnormal wear due to this issue, dealers will replace the engine. The remedy will be provided free of charge.

Reimbursement Plan for pre-notification remedies

The owner letter will instruct vehicle owners who have paid to have this condition remedied prior to this campaign to seek reimbursement pursuant to Toyota's General Reimbursement Plan.
