Subject: SECOND NOTIFICATION: Urgent B7B Safety Recall - PLEASE SCHEDULE YOUR REPAIR TODAY

Greetings,

This is my **Second Email Notification** to you regarding an open Safety Recall on your Company Lease Vehicle. We need you to schedule an appointment to have this recall completed this month.

As a Company Vehicle Custodian, you are required to have all open recalls repaired in a timely manner. Your safety, and the safety of your passengers, depends on it.

Our records indicate that you have the B7B Collapsed Brake Pedal recall open on your Employee Lease vehicle.

This Recall applies to **2024 - 2025 Alfa Romeo Tonale** and **2024 Dodge Hornet** vehicles.

Your vehicle may have been built with a brake pedal assembly that may collapse while braking. A brake pedal that collapses while driving prevents the driver from being able to activate the service brakes which can cause a vehicle crash without warning. Should this happen, the Electronic Park Brake, located on the center console, can be pulled up and held while driving to slow the vehicle to a controlled stop. Additionally, the Automatic Emergency Braking system, unless deactivated, will intervene without further action from the driver when it detects a collision is imminent.

Recall repairs are **Fast, Free, and Easy**. This repair is estimated to require 30 minutes to complete. You can reach out to your preferred dealer directly or contact Customer Care to help you schedule an appointment.

Additionally, below are some local southeast Michigan dealers that can assist with the recall completion.

Serra CDJR - (248) 393-2222

Rochester Hills CDJR - (248) 652-9650

Golling CDJR - (248) 334-3600

Stellantis Recall Contact Center - (800) 853-1403

Please contact [REDACTED] with any questions.

We will continue to monitor the status of your VIN and reach out to you until it is repaired. You will continue to hear from me until your vehicle is repaired.

Please call TODAY to make a free appointment to complete the repair before December 31st.

Thank you,

[REDACTED]

Head of Mopar
