Dear Ms. Carlson:

Volkswagen hereby submits the following added information to amend the chronology associated with the subject recall (original recall filing October 30, 2024).

Chronology of Defect

November 11, 2024 – Possible missing VINs were identified during campaign planning. Investigation into missing VINs initiated.

November 28, 2024 – The investigation findings were presented to Volkswagen's Product Safety Committee, which indicated that certain Passat vehicles that had previously received a like-for-better repair were inadvertently not included in the initial recall population. Volkswagen's Product Safety Committee decided to expand the recall population to include these additional vehicles. The additional VINs will be included in a separate recall code, 69E6.

Please contact me if you require any additional information or have any questions related to this information.

Sincerely,

Christopher T. Sandvig
Director, Group Customer Protection
