## Safety Notice – R10329

We have identified a potential issue with your car, where braking functionality may be temporarily affected after **coasting downhill with 'B' mode selected** (if you have a plug-in hybrid car) or **One Pedal Drive activated** (if your car is pure electric).

We're working on a corrective software update. We'll notify you when it's ready.

In the meantime, we ask that you:

- **Do not select 'B' mode** via the gear lever  
(if you have a plug-in hybrid car)
- **Turn off One Pedal Drive** via  
Settings > Driving > One Pedal Drive > Off  
(if you have a pure electric car)
