

Ford App Notification:

Important Safety Recall 25SC4/25V789 on Your Vehicle

Body:

A manufacturing defect in one or more of the high voltage battery cells may result in an internal short circuit and battery failure. Battery failure can cause a loss of drive power, increasing the risk of a crash. Battery failure can also increase the risk of a fire.

You should immediately set your vehicle's battery charge limit to 80% and drive in Auto EV mode only.
