Description of Defect :

Description of the Defect : In affected motorcycles, brushes inside the Throttle Position Sensor (TPS) will slide excessively due to improper ECU programming. While the motorcycle is driven, this excessive sliding generates abrasion particles that can accumulate on the contact points in the TPS.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : The defect can cause unstable idling and engine stalling, potentially resulting in loss of control and a crash with severe injury or death.

Description of the Cause : NR

Identification of Any Warning that can Occur : The malfunction indicator light will illuminate while displaying a P2135 fault code.

Involved Components :

Component Name 1 : Software

Component Description : Reprogramming software for MT09 Series.

Component Part Number : 90891-30177-00

Component Name 2 : TPS

Component Description : Throttle Sensor Assembly MT09 Series

Component Part Number : 90891-30169-00

Supplier Identification :

Component Manufacturer

Name : Yamaha Motor Co., Ltd.

Address : NR

Foreign States

Country : Japan

Chronology :

March 2025, Pure Sports Distributing Inc. DBA: Yamaha of Hawaii was informed by the manufacturer, Yamaha Motor Co., LTD that such a condition could exist in units. This was determined pursuant to quality control review and testing. April 2025, Yamaha Motor corporation USA made the Throttle Sensor Assembly MT09 Series (TPS) part available and completed an order for all affected units sold to Yamaha dealers in Hawaii.

Description of Remedy :

Description of Remedy Program : To correct this issue, Yamaha is initiating a Factory Modification Campaign. Affected motorcycles that are sold and have been operated must have the ECU reprogrammed ("reflashed") and the TPS replaced with a new one. Depending on the model, this can take up to an hour and a half to accomplish. This will be at no charge to the owner.

How Remedy Component Differs from Recalled Component : No difference. The worn TPS is being replaced with a new TPS.

Identify How/When Recall Condition was Corrected in Production : Programming has been corrected in production.

Recall Schedule :

Description of Recall Schedule : We initiated preliminary outreach by emailing owners who provided email addresses in their warranty cards. Additionally, dealers have been preliminarily notified.

Concurrently, we secured the necessary repair parts (Throttle Position Sensors) and determined the software update, while finalizing our NHTSA portal credentials and reporting requirements.

We anticipate commencing formal dealer and owner notifications shortly after NHTSA approvals. Upon receipt, we project printing within 5 business days, with first-class mailing to owners commencing within 7 business days thereafter. We project completion of the mailing process within the 60-day notification window.
