Re: Stop Sale/Safety Recall: 2021-2025 MDX, TLX Type-S PGM-FI Software Update

On January 23, 2025, Acura notified NHTSA of a **stop sale** and **safety recall** for certain 2022-2025 MDX Type-S and 2021-2025 TLX Type-S vehicles to resolve a software programming issue. In certain situations, the vehicle may experience reduced drive power, or the engine may stall without warning, increasing the risk of a crash or injury. **Refer to your eResponsibility report or perform an iN VIN status inquiry to determine which units in your inventory are affected.**

**REPAIR**

Update the PGM-FI software.

**SOFTWARE**

The updated software will be available at launch.

**PARTS**

There are no parts needed for this recall.

**TOOLS**

There are no new special tools needed for this recall.

**SERVICE BULLETIN**

Service Bulletin 25-010, *Safety Recall: 2021–25 TLX Type S, 2022-25 MDX Type S PGM-FI Software Update (DTC P061B)* posted to the Service Information System (SIS) as of January 28, 2025. It includes software repair and warranty claim information related to this recall.

**CLIENT NOTIFICATION**

Acura expects to begin client notification in late March 2025.

As always, perform an iN VIN status inquiry for all vehicles passing through your dealership to determine eligibility for any open campaigns.
