Re: Stop Sale/Safety Recall: 2025 Pilot 3rd Row Seat Belt Latch Inspection

On February 5, 2025, American Honda notified NHTSA of a **stop sale** and **safety recall** for certain 2025 Pilot vehicles. During assembly, the passenger side third row seat belt may have been improperly routed, trapping and hiding the seat belt latch plate behind the rear side liner panel, rendering the seat belt unusable. If an occupant is unable to fasten their seat belt, the risk and/or severity of an injury are increased while the vehicle is in operation and/or in a crash. **Refer to your eResponsibility report or perform an iN VIN status inquiry to determine which units in your inventory are affected.**

REPAIR

Inspect and, if necessary, properly route the passenger side third row seat belt latch plate.

PARTS

There are no parts needed for this recall.

TOOLS

There are no new special tools needed for this recall.

SERVICE BULLETIN

Service Bulletin 25-018, *Safety Recall: 2025 Pilot 3rd Row Seat Belt Route Inspection* posted to the Service Information System (SIS) as of February 6, 2025. It includes inspection, repair and warranty claim information related to this recall.

CUSTOMER NOTIFICATION

American Honda expects to begin customer notification in late March 2025.

As always, perform an iN VIN status inquiry for all vehicles passing through your dealership to determine eligibility for any open campaigns.
