AUDI DEALER COMMUNICATION

Repair Available – Compliance Recall 454R / Brake Control Unit Software

This notice is for: All Dealer Personnel

Date: March 04, 2025

Issue: Under certain circumstances, the "N" gear position may not be shown in the instrument cluster when it should be displayed. As such, these vehicles fail to comply with regulatory requirements.

If the correct transmission gear position indicator is not shown and the electronic parking brake is not engaged, the driver may be unable to identify the transmission shift position, increasing the risk of a crash and vehicle roll away.

Precautions: If the parking brake is not engaged, the red parking brake indicator light on the instrument cluster will not be illuminated. Before leaving the vehicle, owners are advised to confirm the parking brake indicator light has illuminated in order to help avoid a situation where the vehicle could roll when it is not intended to do so.
