URGENT - DISTRIBUTE IMMEDIATELY

Date: May 9, 2025

Subject: PicoScope for L87 Field Action

Previously announced, Safety Recall N252494000 Stop Delivery, will require a GM PicoScope for the future service procedure.

A GM PicoScope was sent to all US and Canadian dealers in 2015 as an Essential Tool. The GM PicoScope sent in 2015 and subsequent derivatives will work with the service procedure, provided it is a GM Branded PicoScope and not an aftermarket equivalent. The GM PicoScope will be used in conjunction with harness GM-60539 that is being auto shipped to dealers May 5-14, 2025.

IMPORTANT: In the event that the GM PicoScope cannot be located at your dealership, please order GM-51450-SCOPE-B from [gmglobaltools.com](http://gmglobaltools.com). Inventory is expected to begin arriving by the end June 2025

We are asking dealers to only order one unit at this time as inventory is limited. Other PicoScope accessories, such as NVH, electrical diagnostics, etc. that are separate will be made available at a later date.
