

MACK TRUCKS RECALL ALERT

Subject: Recall SC0479 Under Rated Axle Drum Brakes

Recall Number: SRA-M479

Date: May 30, 2025

Applicable Markets:

U.S. Canada Mexico Export

Description

Certain Mack Heavy Duty trucks may have been built with drive axle brake drums which should have derated the vehicle rear axle rating from 29,000 lbs to 27,000 lbs. This configuration issue causes the vehicle certification label to misrepresent the actual weighting capacity.

This may cause the operator to overload the vehicle, which may increase the potential risk of accident or injury.

Model and Model Years Affected

Certain 2026 Granite (GR) model vehicles manufactured from March 4, 2025, through May 7, 2025.

Vehicle Quantities

5 vehicles (5 US)

Dealer Responsibilities

The National Traffic and Motor Vehicle Safety Act and Canadian Motor Vehicle Safety Act require dealers to ensure that all new and used vehicles are free of safety defects and comply with all relevant safety standards at the time of delivery to the consumer.

Dealers should make their personnel aware of the safety recall. In the event that a dealer has a vehicle included in the safety recall in their inventory to be sold, the condition must be corrected before releasing it to a customer.

Notification Release Schedule

- Vehicle list will be posted on the Trucks Dealer Portal May 30, 2025.
- Owner notification letters will be released on or before July 21, 2025.
- Repair Instructions will be released once they are available.

Contact

If you have questions or concerns about this recall, contact the Regulatory Affairs Department at vtna.regulatoryaffairs@volvo.com.
